Documenta Mathematica
Band 13, 2008

V. Gritsenko, K. Hulek and G. K. Sankaran
Hirzebruch-Mumford Proportionality and
Locally Symmetric Varieties of Orthogonal
Type 1–19

Tom Leinster
The Euler Characteristic of a Category 21–49

Sergey Morozov
Essential Spectrum of Multiparticle
Brown–Ravenhall Operators in External Field 51–79

A. Vishik, K. Zainoulline
Motivic Splitting Lemma 81–96

Jörg Winkelmann
On Tameness and Growth Conditions 97–101

V. Bach, J. Hoppe, D. Lundholm
Dynamical Symmetries in
Supersymmetric Matrix 103–116

Jürgen Ritter and Alfred Weiss
Equivariant Iwasawa Theory: An Example 117–129

Guido Kings
Degeneration of Polylogarithms and Special Values
of $L$-Functions for Totally Real Fields 131–159

Alex Kumjian, David Pask, Aidan Sims
$C^*$-Algebras Associated to Coverings of $k$-Graphs 161–205

Alex Postnikov, Victor Reiner, Lauren Williams
Faces of Generalized Permutohedra 207–273

Denis Perrot
Secondary Invariants for Frechet Algebras
and Quasihomomorphisms 275–363

Paul S. Muhly and Baruch Solel
Schur Class Operator Functions
and Automorphisms of Hardy Algebras 365–411

Viorel Costeanu
On the 2-Typical De Rham-Witt Complex 413–452

Ciro Ciliberto, Gerard van der Geer
Andreotti–Mayer Loci and the Schottky Problem 453–504

Wiesława Nizioł
K-Theory of Log-Schemes I 505–551

Eric A. Carlen and Elliott H. Lieb
Brascamp-Lieb Inequalities
for Non-Commutative Integration 553–584

Gereon Quick
Profinite Homotopy Theory 585–612

F. Déglise
Around the Gysin Triangle II. 613–675

Matthias Künzer
Comparison of Spectral Sequences
Involving Bifunctors 677–737

Goro Shimura
Arithmetic of Hermitian Forms 739–774

Goro Shimura
The Critical Values of Certain Dirichlet Series 775–794

Christian Ausoni, Bjørn Ian Dundas and John Rognes
Divisibility of the Dirac Magnetic Monopole
as a Two-Vector Bundle over the Three-Sphere 795–801

Timothy Logvinenko
Natural G-Constellation Families 803–823

Eva Viehmann
The Global Structure of Moduli Spaces
of Polarized $p$-Divisible Groups 825–852
