

DOCUMENTA MATHEMATICA

BAND 22, 2017

E. BAYER-FLUCKIGER AND R. PARIMALA COHOMOLOGICAL INVARIANTS FOR G -GALOIS ALGEBRAS AND SELF-DUAL NORMAL BASES	1–24
MATTHIAS NAGEL, MARK POWELL CONCORDANCE INVARIANCE OF LEVINE-TRISTRAM SIGNATURES OF LINKS	25–43
MIKHAIL BONDARKO AND GONÇALO TABUADA PICARD GROUPS, WEIGHT STRUCTURES, AND (NONCOMMUTATIVE) MIXED MOTIVES	45–66
LIDIA ANGELERI HÜGEL AND DIRK KUSSIN LARGE TILTING SHEAVES OVER WEIGHTED NONCOMMUTATIVE REGULAR PROJECTIVE CURVES	67–134
A.D. MĂCINIC, Ş. PAPADIMA, C.R. POPESCU MODULAR EQUALITIES FOR COMPLEX REFLECTION ARRANGEMENTS	135–150
FINNUR LÁRUSSON AND TUYEN TRUNG TRUONG ALGEBRAIC SUBELLIPTICITY AND DOMINABILITY OF BLOW-UPS OF AFFINE SPACES	151–163
P. EBENFELT, B. LAMEL, AND D. ZAITSEV NORMAL FORM FOR INFINITE TYPE HYPERSURFACES IN \mathbb{C}^2 WITH NONVANISHING LEVI FORM DERIVATIVE	165–190
PRZEMYSŁAW CHOJECKI, D. HANSEN, AND C. JOHANSSON OVERCONVERGENT MODULAR FORMS AND PERFECTOID SHIMURA CURVES	191–262
ALBERTO LÓPEZ MARTÍN, MONTSERRAT TEIXIDOR I BIGAS LIMIT LINEAR SERIES ON CHAINS OF ELLIPTIC CURVES AND TROPICAL DIVISORS ON CHAINS OF LOOPS	263–286
RICHARD CREW RIGIDITY AND FROBENIUS STRUCTURE	287–296
DIEGO IZQUIERDO VARIÉTÉS ABÉLIENNES SUR LES CORPS DE FONCTIONS DE COURBES SUR DES CORPS LOCAUX	297–361
TOM BACHMANN ON THE INVERTIBILITY OF MOTIVES OF AFFINE QUADRICS	363–395
T. GEE, F. HERZIG, T. LIU, D. SAVITT POTENTIALLY CRYSTALLINE LIFTS OF CERTAIN PRESCRIBED TYPES	397–422

RASMUS BENTMANN, RALF MEYER A MORE GENERAL METHOD TO CLASSIFY UP TO EQUIVARIANT KK-EQUIVALENCE	423–454
KRISTIAN RANESTAD, CLAIRE VOISIN VARIETY OF POWER SUMS AND DIVISORS IN THE MODULI SPACE OF CUBIC FOURFOLDS	455–504
HEER ZHAO LOG ABELIAN VARIETIES OVER A LOG POINT	505–550
LAIACHI EL KAOUTIT, NIELS KOWALZIG MORITA THEORY FOR HOPF ALGEBROIDS, PRINCIPAL BIBUNDLES, AND WEAK EQUIVALENCES	551–609
ARNAB MITRA, OMER OFFEN, EITAN SAYAG KLYACHKO MODELS FOR LADDER REPRESENTATIONS	611–657
ANSELM KNEBUSCH, PETER LINNELL, THOMAS SCHICK ON THE CENTER-VALUED ATIYAH CONJECTURE FOR L^2 -BETTI NUMBERS	659–677
MICHEL BRION COMMUTATIVE ALGEBRAIC GROUPS UP TO ISOGENY	679–725
THIERRY JECKO, AIMAN MBAREK LIMITING ABSORPTION PRINCIPLE FOR SCHRÖDINGER OPERATORS WITH OSCILLATING POTENTIALS	727–776
STEFANO MORRA SUR LES ATOMES AUTOMORPHES DE LONGUEUR 2 DE $\mathbf{GL}_2(\mathbf{Q}_p)$	777–823
PAUL F. BAUM, KENNY DE COMMER, PIOTR M. HAJAC FREE ACTIONS OF COMPACT QUANTUM GROUPS ON UNITAL C^* -ALGEBRAS	825–849
GUNTHER CORNELISSEN AND VALENTIJN KAREMAKER HECKE ALGEBRA ISOMORPHISMS AND ADELIC POINTS ON ALGEBRAIC GROUPS	851–871
KENGO MATSUMOTO TOPOLOGICAL CONJUGACY OF TOPOLOGICAL MARKOV SHIFTS AND CUNTZ–KRIEGER ALGEBRAS	873–915
YURI YATAGAWA EQUALITY OF TWO NON-LOGARITHMIC RAMIFICATION FILTRATIONS OF ABELIANIZED GALOIS GROUP IN POSITIVE CHARACTERISTIC	917–952
PAVOL ŠEVERA AND FRIDRICH VALACH LIE GROUPS IN QUASI-POISSON GEOMETRY AND BRAIDED HOPF ALGEBRAS	953–972
IDO EFRAT THE COHOMOLOGY OF CANONICAL QUOTIENTS OF FREE GROUPS AND LYNDON WORDS	973–997

LAURENT BERGER AND LIONEL FOURQUAUX IWASAWA THEORY AND F -ANALYTIC LUBIN-TATE (φ, Γ) -MODULES	999–1030
JOHAN STEEN AND GREG STEVENSON ENRICHMENT AND REPRESENTABILITY FOR TRIANGULATED CATEGORIES	1031–1062
PIAZZA, FIORENTINO, GRUSHEVSKY, PERNA, MANNI VECTOR-VALUED MODULAR FORMS AND THE GAUSS MAP	1063–1080
MIROSLAV ENGLIŠ, GENKAI ZHANG TOEPLITZ OPERATORS ON HIGHER CAUCHY-RIEMANN SPACES	1081–1116
SANGHOON BAEK, ROSTISLAV DEVIYATOV, KIRILL ZAINOULLINE THE K -THEORY OF VERSAL FLAGS AND COHOMOLOGICAL INVARIANTS OF DEGREE 3	1117–1148
LAURENT CLOZEL SUR L'INDUCTION AUTOMORPHE POUR DES p -EXTENSIONS RADICIELLES ET QUELQUES AUTRES OPÉRATIONS FONCTORIELLES (MOD p)	1149–1180
INDRANIL BISWAS AND TOMÁS L. GÓMEZ AUTOMORPHISMS OF A SYMMETRIC PRODUCT OF A CURVE (WITH AN APPENDIX BY NAJMUDDIN FAKHRUDDIN)	1181–1192
GOULNARA N. ARZHANTSEVA, CHRISTOPHER H. CASHEN, DOMINIK GRUBER, AND DAVID HUME CHARACTERIZATIONS OF MORSE QUASI-GEODESICS VIA SUPERLINEAR DIVERGENCE AND SUBLINEAR CONTRACTION	1193–1224
DAVID GEPNER, RUNE HAUGSENG, THOMAS NIKOLAUS LAX COLIMITS AND FREE FIBRATIONS IN ∞ -CATEGORIES	1225–1266
DIRK HUNDERTMARK, YOUNG-RAN LEE WHY DO SOLUTIONS OF THE MAXWELL–BOLTZMANN EQUATION TEND TO BE GAUSSIANS? A SIMPLE ANSWER	1267–1273
YANNICK BONTHONNEAU THE Θ FUNCTION AND THE WEYL LAW ON MANIFOLDS WITHOUT CONJUGATE POINTS	1275–1283
